Empathy Map

Persona: **Rahul** – Fitness Enthusiast / End User of AI Fit Track.

SAYS • "I never know if I'm actually improving or just repeating the same routine." • "My workout notebook is a mess of crossed-out numbers." • "I wish someone could just tell me what to do next."	**THINKS** • "There has to be a more reliable way to track this than paper." • "I wish an app understood my goal, not just logged numbers." • "I don't want to lose years of training history to a lost notebook."
PERSONA — Rahul · Fitness Enthusiast / Registered User	
DOES • Writes down sets, duration and estimated calories in a notebook after every session. • Manually flips back through old pages to gauge progress. • Searches online for generic workout plans that don't account for his own history.	**FEELS** • Frustrated by inconsistent, error-prone manual logging. • Directionless without professional guidance. • Motivated and confident when given a clear, personalized plan.

This empathy map directly informed the AI Fit Track feature set: secure, structured workout CRUD with search (addresses SAYS/DOES) and Gemini-generated workout recommendations and fitness insights (addresses THINKS/FEELS).
