Project Name	AI Fit Track API
Maximum Marks	2 Marks

Customer Journey Map

Mapped for Rahul's end-to-end journey through AI Fit Track, from account setup to receiving an AI-generated recommendation.

Phase of Journey	Stage 1: Account Setup	Stage 2: Workout Tracking	Stage 3: AI Guidance
Actions What does the customer do?	Registers/logs in; views his profile; receives a JWT for subsequent requests	Adds a workout (name, category, duration, calories, date); views, searches, updates or deletes past workouts	Submits age/goal/experience for a workout recommendation; submits his workout stats for a fitness insight
Touchpoint What part of the service do they interact with?	`POST /api/auth/register`, `POST /api/auth/login`, `GET /api/auth/profile`	`POST /api/workouts/`, `GET /api/workouts/`, `GET/PUT/DELETE /api/workouts/:id`, search	`POST /api/ai/workout-recommendation`, `POST /api/ai/fitness-insights` (Google Gemini integration)
Customer Thought What is the customer thinking?	"I hope my login and history stay secure and available next time."	"Is this actually faster and more reliable than my notebook?"	"This finally tells me what to do next, not just what I already did."
Customer Feeling What is the customer feeling?	Cautiously optimistic	In control and organized	Motivated and confident
Process Ownership Who is in the lead on this?	Auth Controller & Middleware – Thamarai Selvan M, Bhavesh K M	Workout Controller – Deepak Vishal S, Mariya Akash A	AI Controller / Gemini Service – Vishwa R
Opportunities How can we improve this stage?	Add refresh tokens to avoid re-login friction	Add an exercise-level breakdown (sets/reps) per workout	Let users rate AI recommendations to refine future prompts
