No. of Functional Features Included in the Solution

Date	26 September 2026
Team ID	SWTID-2026-2630
Project Name	AI Fit Track API
Maximum Marks	4 Marks

Functional Features Delivered

S.No	Feature	Description	Endpoint(s)
1	Secure User Authentication	Register and login with bcrypt-hashed passwords and JWT issuance	`POST /api/auth/register`, `POST /api/auth/login`
2	Profile Access	Authenticated user can view their own profile	`GET /api/auth/profile`
3	Workout Management (CRUD)	Create, read, update and delete workout records scoped to the logged-in user	`POST/GET/PUT/DELETE /api/workouts/(:id)`
4	Workout Search	Search logged workouts by name/category	`GET /api/workouts/search`
5	AI Workout Recommendation	Google Gemini generates a personalized workout plan from age, fitness goal and experience level	`POST /api/ai/workout-recommendation`
6	AI Fitness Insights	Google Gemini summarizes the user's aggregated workout statistics into a readable insight	`POST /api/ai/fitness-insights`
7	Centralized Error Handling	Consistent structured JSON error responses for auth failures, validation errors and DB errors	Applies across all routes
8	Modular RESTful Architecture	Config/Controller/Middleware/Model/Route/Service separation for maintainability	Applies across all routes

8 functional features delivered within the 15–29 September 2026 cycle, matching the Key Features enumerated in the team's project write-up.
