Project Executable Files

Date	28 September 2026
Team ID	SWTID-2026-2630
Project Name	AI Fit Track API
Maximum Marks	2 Marks

Project Executable Files – Submission Checklist

Item	Status	Location / Notes
Source code (backend)	✓ Included	GitHub repository – https://github.com/thamaraiselvan6/fittrack_team_projt
`package.json` / dependencies	✓ Included	Node.js v16+, Express.js, Mongoose, jsonwebtoken, bcryptjs, dotenv, cors, nodemon (dev)
Environment configuration	✓ Included (as `.env.example`)	`PORT`, `MONGO_URI`, `JWT_SECRET`, `GEMINI_API_KEY` – actual `.env` excluded via `.gitignore`
API test collection	✓ Included	Thunder Client / Postman collection covering all 10 endpoints
Demonstration video	✓ Included	Demo recording (Google Drive)

Actual Project Folder Tree

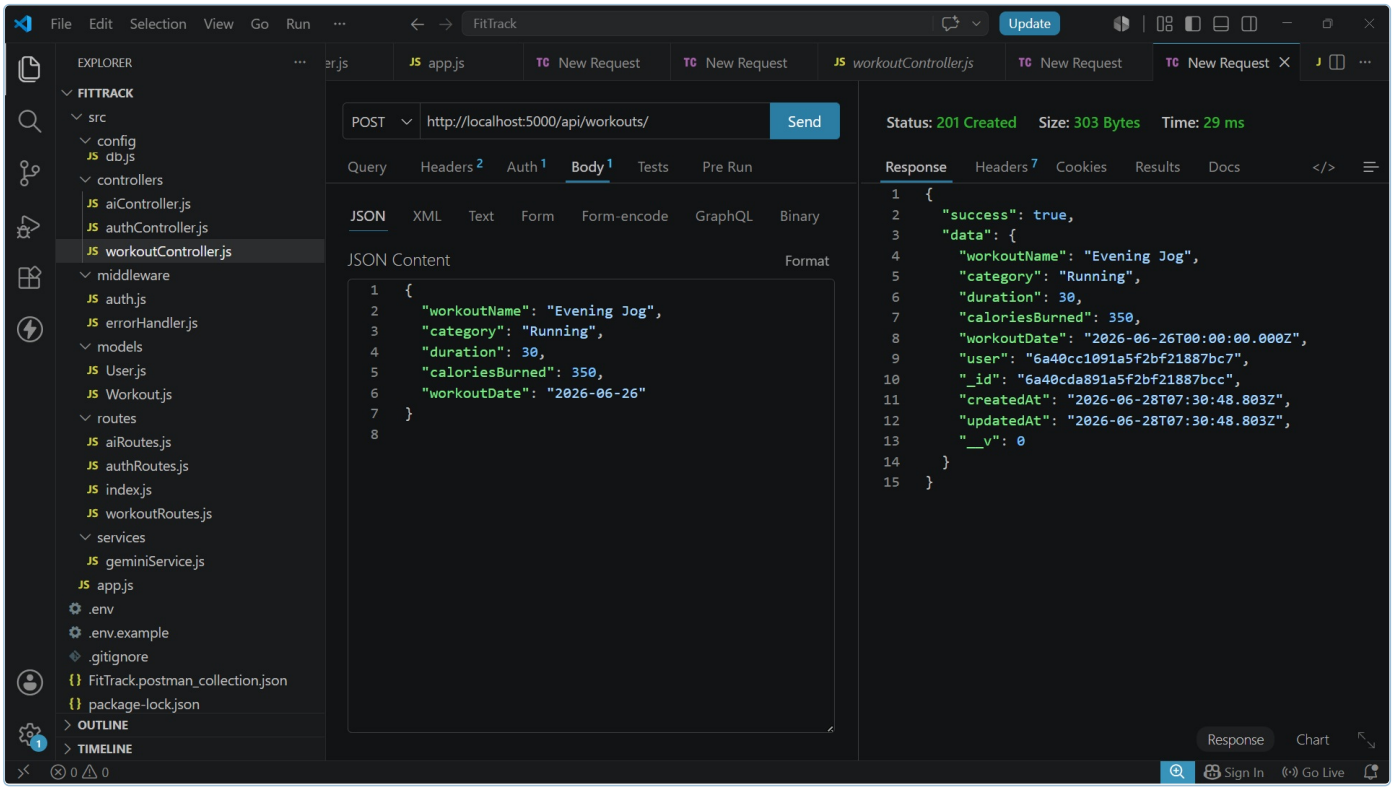

Fig. 1 – Real folder tree captured mid-testing

Deployment & Access Details

Setting	Value
Database	MongoDB (local instance) – `mongodb://localhost:27017/aifittrack`
Server Port	5000 (`process.env.PORT || 5000`)
Run command	`npm install` then `npm run dev` (nodemon) or `npm start`
Base URL (local)	`http://localhost:5000/api`
Demo Test Account	Name: Sathya · Email: sathya@gmail.com · Password: Sathya@01

Known Issues

- The two AI endpoints (`/api/ai/workout-recommendation`, `/api/ai/fitness-insights`) take 5–7.3 seconds to respond because each call depends on live Google Gemini API latency – this is expected external-service behavior, not a defect (see Performance Testing).
- No dedicated frontend is bundled in this cycle; the `client/` folder is a placeholder for a future UI, and all functionality must currently be exercised via Thunder Client/Postman or the shared API collection.
